FLEXIBLE OPTIONS

Remko can offer 4", 6" or 8" standpipe packages, either as a temporary or permanent solution

Available in the following configurations:

- Truck Mounted
- Trailer Mounted
- Skid Mounted

PACKAGE

Fully integrated standpipe pump package has been skillfully designed for ease of transport. The Remko Standpipe Package can be separated, so the pump skid can be located close to the water source and the standpipe base located closer to the roadside for easy access by water trucks or mining tankers.

ENVIRONMENTALLY FRIENDLY

A key benefit of the Remko Standpipe Pump Package is the flexibility in its manufacture which reduces fuel and oil consumption. We can also use air cooled engines to eliminate radiator coolant issues. The base can be incorporated with a self bunded fuel tank to prevent spills into the environment.
