*Remko RS100 Series
100mm Self-Prime Pump*

RS150

*Remko RS150 Series
150mm Self-Prime Pump*

RS200

*Remko RS200 Series
200mm Self-Prime Pump*

Self priming with dependable performance makes RS Series Pumps a sensible solution for industry and municipalities requiring little maintenance, resulting in significant savings of time and money.

RS offers sizes 80mm, 100mm, 150 mm and 200mm. Designed to operate over a range of speeds, thus achieving a wide range of duty points. Offering design flexibility, simple to service and tolerant to abuse.

Properly applied and installed, RS Series Pumps are ideally suited for industrial applications including: Dust Suppression, Road Construction, Dewatering, Tanker Filling - Standpipe Application and Irrigation.

Rugged construction guarantees that each pump will provide years of dependable service.

Remko RS Series have the important feature of much greater volume in the pump bowl chamber. This enables the pump to reprime in an open system.

Self-priming RS Series pumps are available as basic units for replacement or existing equipment, or as a complete pumpset. They may be powered by electric, diesel or gasoline engine, Flex-coupled or V-belt driven.

RS Series

A sensible solution for industry, RS Series Pumps are self priming with dependable performance. Pumps require little maintenance resulting in significant savings of time and money.

Support Services

Design

Pump Testing

PRODUCT DESIGN SERVICE Remko can design and supply a pumping solution to suit the most challenging requirements. Contact your representative for further information.

PUMP TESTING

The key to a successful pump package is the ability to fully test and pre-commission the unit prior to delivery.

Operational parameters can be set and the entire system sequence tested under simulated site conditions to reduce on-site installation time and ensure trouble-free and reliable operation.

Service

Service Contracts

REPAIRS AND SPARE PARTS Remko and the distributors have a range of spare parts available to keep pumps operational with limited downtime.

Repair

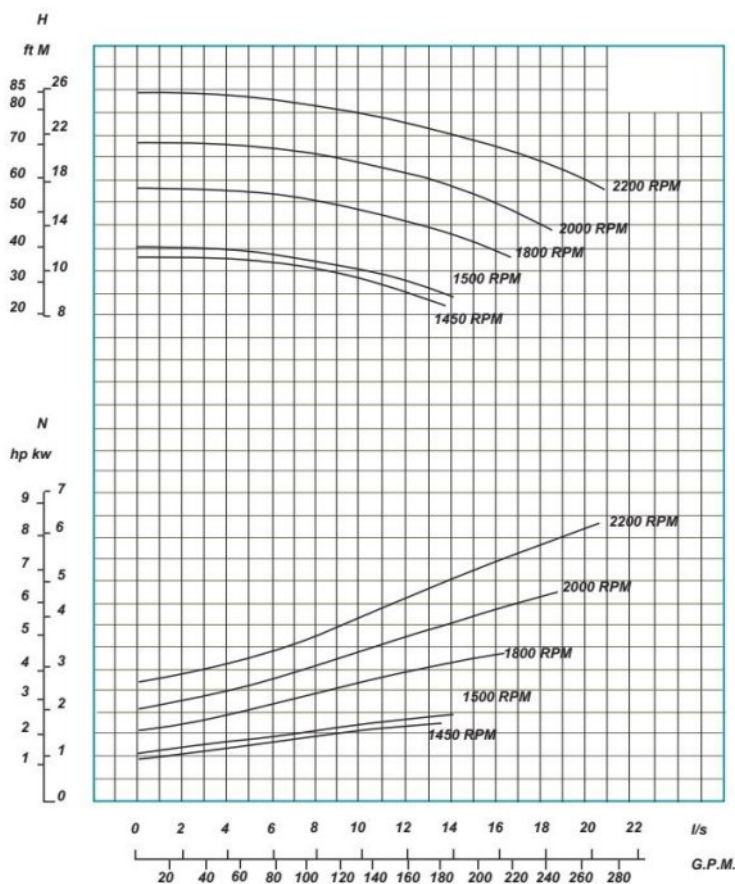

Spare Parts

SERVICE CONTRACTS

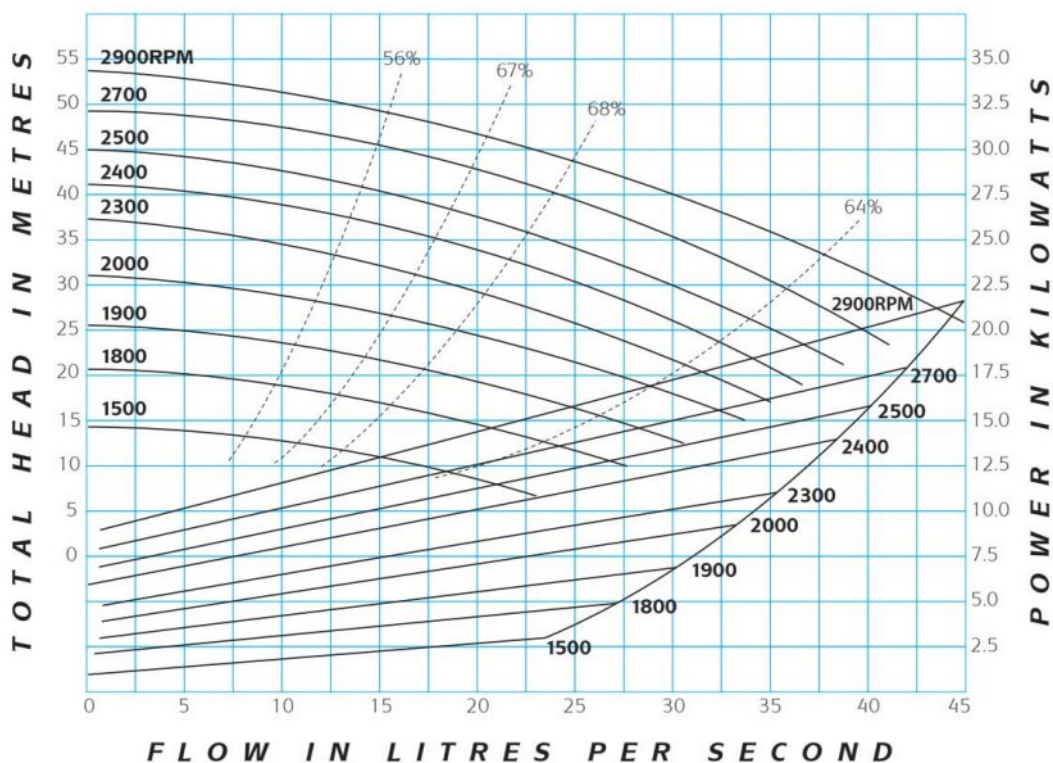

Regular and periodic service contracts ensure pumps and associated equipment are maintained professionally to avoid costly interruptions to production.
