

REMKO is one of the leading manufacturers of a wide range of water truck quick fill standpipe systems. These are heavy duty hot dip galvanised packages engineered and manufactured in Australia for the harsh weather conditions.

Remko standpipes are available in a range of sizes and options to suit all types of truck fill applications from road construction tankers to water carts in mining sites with flows up to 400 L/sec.

Our standard standpipe packages include 4", 6", 8" and 12" pipe sizes with up to 8 meters fill height to cover the larger mining water carts. Stainless steel pipework is also offered as an alternate to galvanised steel in certain harsh environments.

KEY FEATURES

- Fully Hot Dip Galvanised
- Corrosion Resistant
- Forklift Pockets for Lifting
- Standard Sizes: 4", 6", 8" and 12"
- Fill Heights: 5.2m to 8.0m
- Flat Pack Design for Easy Transportation
- Fast Fill Times
- Rentals Available
- Standpipe Pump Packages Available

TYPICAL APPLICATIONS

- Dust Suppression
- Road Compaction
- Mining & Quarries
- Civil Construction Sites
- Fill Heights: 5.2m to 8.0m
- Municipal Infrastructure
- Water Transfer
- Dewatering

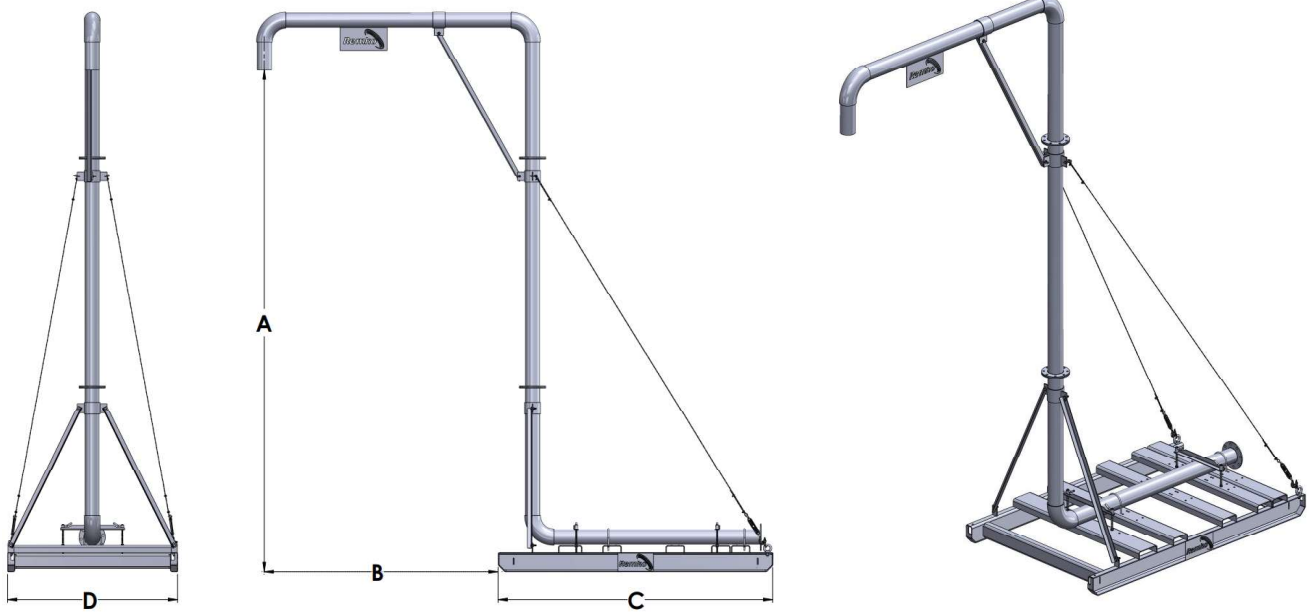

OPTIONS AVAILABLE

- Flow Meter
- Data Telemetry Option
- Flood Lights
- Hose Package with Foot Valve Strainer
- Trailer Mounted
- Bauer or Camloc Fittings
- Isolation Valves
- Wind & Cyclone Rating

Engineered for Safety

BUILT TO BE TOUGH
